

Consulting Services

Delivered within the
ADEPT Technology Life Cycle Methodology

Assessment - Organize your IT initiatives with a roadmap that provides focus and direction toward your business goals and drives ROI based decisions. Includes on-site gap analysis, capacity plan, and system health checks.

Design - Tap into our vast knowledge base of successful best practices and industry experience by utilizing our certified engineers to provide a proof of concept and cost/benefit analysis for your project plan.

Execution - Ensure proper implementation with expert project management, staging and configuration, as-built documentation, multi vendor coordination, testing and certification.

Production - Improve productivity with our real-world tested methodologies to support your processes and procedures for network management, documentation, problem resolution, performance tuning, moves, adds, or changes.

Training - Maximize ROI with a combination of in-depth knowledge transfers, vendor certifications, on-site customized training classes, hands-on learning, and curriculum development

Contact us to customize any combination of the services above to address your business goals. For maximum value, we'll assist your organization from the start of the ADEPT life cycle to the finish.
